

Miteinander leben
Voneinander lernen
Einander verstehen

Since 5 years now I know the artproject Angel of Culture of the artists Carmen Dietrich and Gregor Merten. I estimate it very much because it brings people together and helps to get know one another. Particularly children and young people meet the Angel of Culture if they take part in the performances of the artists and get motivated to live together in peace.

For me it is the best symbol against fundamentalism, terrorism and inhumanity in the name of God.

On my last journey to Israel and Palestine I visited the Tent of Nations to have a look at the great Angel of Culture-installation. I think it is a very important and bold project and a symbol of hope in this region. The idea that every visitor of the peace camp can work on it will bring the message of the Angel of Culture into many countries all over the world. It is so huge and impressive that nobody will ever forget it.
