Niamey, the 11th January, 2017

**Ms. Abdou Gado Mariama** has been registered as medical student in the Faculty of Health Sciences at University Abdou Moumouni of Niamey in 2014. Since her first year in the faculty, she was attracted by the cultural and sportive commission that she integrated without hesitation.

Talented in many sectors as singing, poetry and drama, she brightly contributes in organizing the cultural activities in the frame of the "Health Science Student Week" which is celebrated each year in our faculty.

In all her performances, she has always done very well. We call her "*Celine Dion*" because of her beautiful voice and incredible interpretation of the single "*titanic*" during our repetitions.

Her work and implication in the commission earned her to be selected with some other students to present a drama for the congress of "*National Hospital Lamordé of Niamey*" in presence of the First Lady Dr. Lalla Malika Issoufou in 2015. A drama that was very appreciated and applauded by our teachers and classmates; and in which she has the principal role as Doctor.

**Ms. Mariama** is a very devoted and conscientious student. In our commission, she is so respected by the first responsables and her colleagues. She stays always ready to help others as much as she can and do the promotion of her faculty and country in general.

Her capacities of adaptation and organization are undeniable. That's why her implication in humanitarian and in the activities of our faculty has never impacted on her studies. The proof is that since her first year, she has always succeeded to her exams.

**Ms. Mariama** is clearly an example of courage and modesty.
