

Spiritual Advisors' Meeting Report:

25 spiritual advisors of different faiths unite together in this meeting to discuss each other's progress in the Northeastern community, promote different spiritual and humanist events, and inform one another about different religious/non-religious traditions. This meeting in particular focused on Find, which is a 24/7 mental health and wellness support service available to all Northeastern students across all campuses worldwide. The advisors discussed ways on how to better integrate and introduce this support system to students so that they may feel safer and more welcome on campus, especially if students live thousands of miles away.
