

There are some additional interreligious work areas from our CC, we continue during the year:

THE LITTLE OWL and Facebook Page

The Austrian story „The little owl“ about the question, who created everything, got two animated videos in English and Swahili for schools and adult education in intercultural projects. They were made by students in Kenya.

<https://www.youtube.com/watch?v=zVNRbon9WI0&t=112s>

There are PDF translations in 45 languages for 172 countries available on www.little-owl.net

HEAVEN ON EARTH WIKI and Facebook Page

<http://heaven-on-earth-wiki.org>

To fill this Wiki with information about people, projects, institutions and more, who are working for a good future of the planet is an endless work, because there is such an amount in all countries.

But it brings such a lot of hope in times of great problems on the planet.

Our future plans for interreligious cooperation in Austria and the world:

- To look for more groups, who are working in this area around the country
- To organize a flashmob with people at the bell tower on the mountain to sing and play Beethovens „Ode to joy“ on June 21th 2020 „All people become brothers on earth“ As a concert for the 20th anniversary of URI
- To ask „The learning lions“ students in Kenya for more videos with the story „The little owl“ in other languages for schools in more countries.
- We would like to look for help to find more „Heaven Makers“ all over the world to show them in the <http://heaven-on-earth-wiki.org>
Our aim is to connect people, who work for different projects in the same country, so they can cooperate and save money.
- We plan to invite people from different faith to come to our town and to discuss common aims and how they could work together, because the time of talking is over and the time of collaboration is arising.
- We would continue the „Peace garden project“ in different areas of the world. Especially in Syria and other countries, where Austrian helping organisations are available as partners. We want to spread the knowledge about Keyhole gardens, and other new methods to provide food for a family also in dry areas. <https://www.youtube.com/watch?v=WGbN6lvsH4>
- There are a lot good inventions, who can make the life of many people more easy.
- We hope the Austrian Television will realize the plan to make a film about „What we believe“ with statements from people of different faith traditions to work with more information against fear.
- Until WIHW 2021 we want to spread the information about and URI with more politicians, religious communities, schools, universities, media and more.
- We help girls in Kenya with money so they can go to school.
- We help to organize workshops in Kenya about health and family life.

With this hand made smiling faces from wool we want to earn the money for our work.

Also with candles made from clay we try to earn money. They show the words „Light for Life“ and people, who save money for plastic candles can give this to projects for poor children in the name of a person who died. So they can do still good deeds after death.

**With best wishes from the URI CC Austria
„Bildung bringt Frieden – Education creates peace“**

Elisabeth Ziegler-Duregger with Suzanne (France), Lisa (Cechenia), Cecilia (Romania), Margret (Kenya), Martha, Manuela, Almuth, Winfried (Austria) – some are missing on the picture.
