

A „Bell for Peace and Friendship“

On Sunday February 20th, we asked the next generation to ring the bell for a better future of all children in the world. It shows the symbols of 12 religions and the words „I ring for peace and friendship“. The tower shows the words „May peace and friendship prevail on earth“

The little girl Lea is standing on stones from more than 100 countries and from holy places of the worlds religions (we have to cover them during the wintertime to keep the snow out). She is the connection between the little parts from all over the world and the prayers the bell is sending into the sky.

Thousands of people visit this place through the year and are touched by the spirit of the stones, the sound and the surrounding landscape. The idea of the project was born on a war cemetery, to change the bad history in a good future

Stones from Mekka, Lhasa, Israel, Haiffa, Ganges and many more surrounded by pieces of the whole world and from the villages around and the regions of Austria.
