Organic integration of
absorption value and contribution
value.

Absorption value is comprehensively examining the existence of other cultures as reference and turning the advantages of other cultures into resources that are beneficial to perfecting one's own culture. It is because different cultures complement each other remarkably that conducting dialogue among each other becomes highly necessary. During such a process, each culture should be established on its own position and enlarge its vision, enrich its content and elevate its state by understanding and learning the excellent fruit of other cultures.

Contribution value refers to making in-depth summary of the positive values of the existence of one culture contributes to other culture and making appropriate constructive suggestions to other cultures. The more positive values a culture contributes to other cultures, the

More it can be respected and recognized by other cultures, and the more it can make great contribution to the whole human culture. The underlying driving force of the improvement and progress of human culture comes from the gathering and integration of the positive value of all the cultures.

The prospect of peace and harmony of all the human being mean peace and harmony among all the nations, ethnic groups and religions. Meanwhile, it is peace and harmony of each nation, ethnic group and religion that constitute peace and harmony of all the human beings. The "Harmony culture", an excellent tradition of Chinese civilization, has lasted for thousands of years and made tremendous contribution to promoting the harmonious coexistence of various ethnic groups and the convergence and fusion of religious cultures.

To survive in peace and
harmony, united and
strong, we must have
one people, one nation
One flag.

• "The life of inner peace, being
harmonious and without stress is
the easiest types of existence."

• Peace and harmony is the most
basic need of any nation for its
prosperity. Only if a nation
enjoy peace and harmony would

prosper and expand its growth. The Constitution of our country includes laws to ensure political and social equality among the citizens in order to avoid chaos and disorder so as to maintain harmony among its citizens.

- The citizens of a country can experience safety and security and can prosper only if a peaceful ambiance is maintained. While the people of India largely enjoy a peaceful and harmonious environment, however, the peace and harmony of the country are disturbed very often because of various unwanted factors.

YOU HAVE TO MAKE
PEACE WITH
YOURSELF. THE KEY
IS TO FIND THE
HARMONY IN WHAT
YOU HAVE.

• India is a Land of unity in diversity. People from different religions, castes, and creeds live together as one people in the country. The Constitution of India ensures its citizens the freedom of equality and various laws are in force to render peace and harmony to all the citizens.

• There would be growth and development only when there are peace and harmony in the country. The government of the country makes every effort to promote peace and harmony in the country. However, it is often disturbed because of some vested interests of some individuals. Though the Indian Constitution provides for the right to equality to all its citizens to ensure harmony among them. Yet there have been many instances wherein the peace has been distorted owing to varying social, political and economic reasons. The government alone cannot take responsibility for maintaining peace and

60

harmony in the country. Each one of us
should take it as our responsibility
to nurture the spirit of Fraternity
among fellow citizens.

I keep The Telephone of Mind Open to
PEACE, HARMONY, HEALTH,
LOVE AND ABUNDANCE.

Then, whenever Doubt,
Anxiety, or Fear
Try to call Me. They will keep
getting A Busy signal And
Soon They will Forget My Number.

- Observe good faith and justice towards all nations. Cultivate peace and harmony with all.
- Discover new peace and harmony within yourself, and naturally this will overflow to benefit others.

what you think,

→ What is Harmony ?

Harmony is one of the most central ideas in many collective cultures. Recently, me and my classmates had an interesting conversation about a situation that happened in a classsetting.

There was a professor who reacted very emotionally and defensively on any suggestion made by the students about how to improve the structure at the cells.

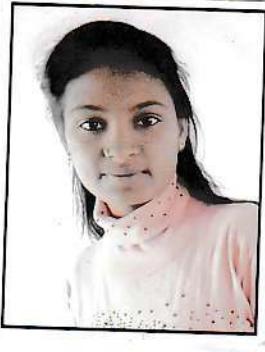

* Love, peace, joy and harmony 63

best Vitamins In the universe. -

* How can we put ourselves into a
mindset at harmony ?

In order to reach this stage,
the following questions can help us:

- Looking at these particular behaviours, what beliefs and values are likely to be underlying them?
- How do these values and beliefs relate to other things you have observed in your now environment?
- Which source of information can you turn to in order to get a much clearer understanding of this belief system?

once we have reached an
intellectual understanding of what
harmony and related concepts really mean,
we then need to go through a phase.
